TECHNICAL BULLETIN # FE 07-05

To: All FE Owners

From: Erik Skirmants, President
Chris Doyle, Technical Manager

Date: 8 June, 2007

Re: FE Nose Box

SCCA Enterprises will now have available a front crush structure recommended by Van Diemen. The part was developed for the international FIA requirements this car must meet in some markets.

It is made from 5/8" (15 mm) thick aluminum honeycomb and bolts directly on new cars (approx Chassis 100 and up), as the front nose mounts already have had the provision for this part added. A new longer nose mounting block is needed for the original cars. We will also offer a bolt kit for your convenience (metric fasteners, washers and jet nuts).

We offer the following:

FE FRONT CRUSH BOX:	PN WM180023	\$785
BOX MOUNTING BLOCKS KIT:	PN WM1180023A	\$85
BOX MOUNTING BOLT KIT:	PN WM1180023B	\$10

Availability is late June with quantity deliveries through July and August. If you are certain you want this part please order it through your CSR so we can estimate numbers. A similar part for the ESR (SRSCCA) is in development but is not yet available.
